Introduction to Salary Management System

User Manual

- **Purpose**

The purpose of this user manual is to provide detailed instructions on how to use the Salary Management System designed for a government organization. It aims to guide users through the various features and functionalities of the system, ensuring efficient and effective use.

- **Audience**

This manual is intended for secretaries and authorized personnel within the public administration department who will be using the system to manage employee salaries and overtime payments.

- **System Overview**

The Salary Management System is a C# WinForms application developed to streamline the payroll process for government organizations. Key features include managing employee details, tracking overtime hours and payments, and generating comprehensive salary reports. The system reduces errors and saves administrative time, providing a secure and user-friendly interface for salary management tasks.

Salary Management System User Manual

Table of contents

Below is the complete table of contents for the manual:

Getting Started

- System Requirements
- Installation
- Initial Setup

Using the System

- Login
- Home Form
- Manage Employee Details
- OT Details
- Search Employee

Advanced Features

- User Management

Troubleshooting

- Common Issues
- FAQs

Appendices

- Glossary
- Contact Information

Getting Started

- **System Requirements**

  1. Hardware:

  - A computer with at least 4 GB of RAM

  - 2 GHz processor or higher

  - 500 MB of free disk space

  2. Software:

  - Windows 7 or later

  - .NET Framework 4.8 or later

  - MySQL Server 5.7 or later

  - MySQL Workbench for database management

- **Installation**

  1. Download the Installer: Obtain the Salary Management System installer from the official source.

  2. Run the Installer: Double-click the installer file and follow the on-screen instructions.

  3. Install MySQL: Ensure MySQL Server and MySQL Workbench are installed on your machine.

  4. Setup Database: Use MySQL Workbench to create a database named `project` and the necessary tables.

- **Initial Setup**

  1. Launch the Application: Open the Salary Management System application.

  2. Database Connection: Enter the database connection string in the provided configuration file.

  3. Create Admin User: Use the system's interface to create an initial admin user with appropriate credentials.

  4. Configure Settings: Adjust system settings as needed, such as organization details and user permissions.

Using the System

- **Login**

  How to Log In: Enter your username and password on the login form. Click the 'Login' button to access the system. If the credentials are correct, you will be directed to the home form. If incorrect, an error message will appear.

- **Home Form**

  Overview: The home form acts as the main dashboard, allowing navigation to various sections of the system.

  Navigation: Buttons on the home form provide access to 'Manage Employee Details', 'OT Details', 'Search Employee', and 'Generate Reports'.

- **Manage Employee Details**

  Add Employee: Click the 'Add Employee' button to open a form where you can enter new employee details.

  Edit Employee: Select an employee from the list and click the 'Edit' button to update their details.

  View Employee Details: Employee details are displayed in a grid view for easy reference.

- **OT Details**

  View Overtime Details: Click the 'OT Details' button to open a form displaying overtime information.

  Update Overtime: Select an employee, update their overtime hours and payment, then click 'Save' to store the changes.

- **Search Employee**

  Search by ID: Enter the employee ID in the search bar and click 'Search'. The employee's details will be displayed in the corresponding textboxes.

  Navigate Back: Click the 'Back' button to return to the home form.

Advanced Features

- **User Management**

  Adding/Removing Users: Navigate to the 'User Management' section. Use the provided interface to add new users by entering their details or remove existing users.

Troubleshooting

- **Common Issues**

  Database Connection Errors: Check the connection string and ensure the database server is running.

  Form Not Opening: Verify that all required fields are filled out correctly.

- **FAQs**

  How do I add a new employee?

  Navigate to the 'Manage Employee Details' form and click the 'Add' button.

Appendices

- **Glossary**
